Set A - Solution

Q1: Grade Assignment

Python Copy code

```python
score = int(input("Enter student's score: "))
if score > 90:
    grade = 'A'
elif score > 75:
    grade = 'B'
elif score > 65:
    grade = 'C'
else:
    grade = 'D'
print("Grade:", grade)
```

Q2: Slice [2:5] from "THISISWORLDBESTPRACTICE"

Python Copy code

```python
text = "THISISWORLDBESTPRACTICE"
print(text[2:5])  # Output: "ISI"
```

Q3: Read and write into file

Python Copy code

```python
# Read
with open("file.txt", "r") as file:
    content = file.read()
    print("File Content:", content)

# Write
with open("file.txt", "w") as file:
    file.write("This is a write operation.")
```

Q4: Class with two data members

Python Copy code

```python
class Student:
    def __init__(self, name, marks):
        self.name = name
        self.marks = marks

s1 = Student("John", 85)
print(s1.name, s1.marks)
```

Q5: Draw a line from (1,3) to (8,10) using matplotlib

Python Copy code

```python
import matplotlib.pyplot as plt

x = [1, 8]
y = [3, 10]
plt.plot(x, y, marker='o')
plt.title("Line from (1,3) to (8,10)")
plt.show()
```

Set B - Solution

Q1: Print 5th table using for loop

Python Copy code

```python
for i in range(1, 11):
    print(f"5 x {i} = {5*i}")
```

Q2: Slice [4:12]

Python Copy code

Ask anything

Here’s the most basic version of read, write, and append in Python:

Python Copy code

```
# Write
f = open("file.txt", "w")
f.write("Hello\n")
f.close()

# Read
f = open("file.txt", "r")
print(f.read())
f.close()

# Append
f = open("file.txt", "a")
f.write("World\n")
f.close()

# Read again
f = open("file.txt", "r")
print(f.read())
f.close()
```

This is as simple as it gets. Let me know if you want to do this with input from the user.
